The safety development committee for each campus met in May 2021 to review the network 2020-2021 Crisis Response Emergency Plan. Any comments, questions, feedback, and new ideas were presented to the Governing Body’s School Safety Designee.

The School Safety Designee took these steps over summer 2021 in developing the new emergency response plans for the 2021-2022 school year:

- Reviews all safety meeting notes and feedback from each campus throughout the school year
- Meets with school and emergency personnel across Southern Nevada
- Receives training on updated methods and techniques for improving school safety

The network safety development committee reviewed the 2021-2022 Crisis Response Emergency Plan in August 2021 and approved its use for the network.

For public and school safety, the crisis response emergency plan is not made publicly available.
